### **About Blue Thunder**

Blue Thunder is a gold-focused company that controls 100% of a large land position near Chibougamau, Québec. The Muus Project covers approximately 52,000 hectares in five separate blocks of prospective ground in the eastern part of the Abitibi Greenstone Belt. The Project is considered particularly prospective for gold mineralization, as a series of prominent ductile and brittle fault-sets transect the Property, including the Guercheville and Fancamp deformation zones, both of which are associated with numerous past and currently producing precious- and base-metal mines in the District.
