Blue Thunder Mining Inc.

Notes to the Condensed Interim Consolidated Financial Statements for the three and six months ended
June 30, 2021 and 2020
(Expressed in Canadian Dollars)

1. Nature of Operations

Blue Thunder Mining Inc. (formerly Platform Eight Capital Corp ("Platform Eight"), the "Company" or "BTMI") was incorporated pursuant to the Business Corporations Act (Ontario) on April 28, 2017. Its corporate office is located at 401 Bay Street, Suite 2704, P.O. Box 4, Toronto, Ontario, Canada, M5H 2Y4 and its shares are traded on the TSX Venture Exchange ("TSXV") under the symbol "BLUE" and on the OTCQB Venture Market ("OTCQB") under the symbol "BLTMF".

BTMI is an exploration company engaged in the identification, evaluation, acquisition and exploration of gold properties in Québec. The Company holds a 100% interest in five non-contiguous mineral exploration properties near Chibougamau, Québec.

On November 28, 2019, Blue Thunder Mining Corporation ("BTMC") entered into an amalgamation agreement ("Amalgamation Agreement") with Platform Eight, a TSXV-listed capital pool company, to complete a reverse takeover transaction (the "BTM Transaction"). On February 12, 2020, pursuant to the Amalgamation Agreement, Platform Eight completed a three-cornered amalgamation with BTMC, with the resulting corporation being continued under the name "Blue Thunder Mining Inc.". See note 17 – *Qualifying Transaction*.

Pursuant to the Amalgamation Agreement, each common share of Platform Eight was exchanged for one common share of BTMI, and each common share of BTMC was exchanged for 26.8476 common shares of BTMI. Following completion of the BTM Transaction each outstanding stock option and warrant to purchase Platform Eight and BTMC common shares were exercisable to purchase BTMI common shares at the same exchange ratios. All shares, options and warrants and per share, option and warrant data have been retroactively adjusted to reflect the exchange ratio as if occurred at the earliest period presented. These condensed interim consolidated financial statements are presented for accounting purposes as a continuation of BTMC, reflecting the acquisition of Platform Eight on a reverse acquisition basis.

2. Going Concern

These condensed interim consolidated financial statements ("Interim Financial Statements") were prepared on a going concern basis of presentation, which contemplates the realization of assets and settlement of liabilities as they become due in the normal course of operations for the next fiscal year. For the three and six months ended June 30, 2021, the Company incurred a net loss of \$1,322,055 (June 30, 2020 - \$1,602,664) and accumulated deficit was \$5,726,578 (December 31, 2020 - \$4,480,252).

These Interim Financial Statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and thus be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these Interim Financial Statements.

Although the Company has taken steps to verify title to exploration and evaluation properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, social licensing requirements, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, expropriation of properties, and political uncertainty.

Blue Thunder Mining Inc.

Notes to the Condensed Interim Consolidated Financial Statements for the three and six months ended
June 30, 2021 and 2020
(Expressed in Canadian Dollars)

The Company has not yet determined whether its exploration and evaluation assets contain economically recoverable reserves. The recovery of amounts comprising the exploration and evaluation assets is dependent upon the establishment and confirmation of recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete the exploration and development of any such reserves, the potential future profitability of any such reserves or alternatively, the disposition, on an advantageous basis, of the Company's interests in the exploration and evaluation assets.

Working capital at June 30, 2021 was \$1,024,508 (December 31, 2020 – \$2,329,708). The Company has no current source of operating cash flow, and there can be no assurances that sufficient funding, including adequate financing, will be available to explore and develop the Company's properties and meet the ongoing general and administrative expenses incurred to maintain operations. The Company's status as a going concern is contingent upon raising the necessary funds through the issuance of equity or debt. Management believes its working capital will be sufficient to support activities for the next twelve months. Raising additional funds will be dependent on exploration results.

COVID-19

In March 2020, the World Health Organization declared a global pandemic related to COVID-19. Its impact on global economies has been far-reaching and business around the world are being forced to cease or limit operations for long or indefinite periods of time. Measures taken to contain the spread of the virus, including travel bans, quarantines, social distancing, and closures of non-essential services have triggered significant disruptions to businesses worldwide, resulting in an economic slowdown. Global stock markets have also experienced high volatility and significant movement. Governments and central banks have responded with monetary and fiscal interventions to stabilize economic conditions. There is significant ongoing uncertainty surrounding COVID-19 and the extent and duration of the impacts that it may have on the Company's financial position and results, exploration activities, workers, partners, consultants, suppliers and on global financial markets. Considerable protocols have been implemented by the Company in order to continue operating in a safe manner.

3. Significant Accounting Policies

Statement of Compliance

The Company applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC"). These condensed Interim Financial Statements have been prepared in accordance with International Accounting Standard 34, *Interim Financial Reporting*. Accordingly, they do not include all of the information required for full interim financial statements required by IFRS as issued by IASB and interpretations issued by IFRIC.

The policies applied in these Interim Financial Statements are based on IFRSs issued and outstanding as of the date of filing this report. The same accounting policies and methods of computation followed in these condensed interim consolidated financial statements are set out in note 3 of the most recently filed annual financial statements as at and for the year ended December 31, 2020, except where noted below. Any subsequent changes to IFRS that are given effect in the Company's annual financial statements for the year ending December 31, 2021 could result in restatement of these Interim Financial Statements.

These Interim Financial Statements are presented in Canadian dollars, the Company's functional currency. All amounts have been rounded to the nearest dollar, unless otherwise noted.

Blue Thunder Mining Inc.

Notes to the Condensed Interim Consolidated Financial Statements for the three and six months ended
June 30, 2021 and 2020
(Expressed in Canadian Dollars)

These Interim Financial Statements were authorized for issue by the Board of Directors on August 27, 2021.

Basis of Presentation

These Interim Financial Statements have been prepared on the historical cost basis except for certain non-current assets and financial instruments, which are measured at fair value, as explained in the accounting policies set out in below. In addition, these Interim Financial Statements have been prepared using the accrual basis of accounting, except for cash flow information.

Basis of consolidation

These Interim Financial Statements incorporate the accounts of BTMI (formerly Platform Eight) and BTMC from February 12, 2020.

Subsidiaries consist of entities over which the Company is exposed to, or has rights to, variable returns as well as the ability to affect those returns through the power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date control is transferred to the Company and are deconsolidated from the date control ceases. These Interim Financial Statements include all the assets, liabilities, revenues, expenses and cash flows of the Company and its subsidiaries after eliminating inter-entity balances and transactions.

Significant Accounting Judgments and Estimates

The preparation of these Interim Financial Statements requires management (“Management”) to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the Interim Financial Statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These Interim Financial Statements include estimates that, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates

Significant assumptions about the future that Management has made that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- The recoverability of other receivables which are included in the statements of financial position;
- Assets’ carrying values and impairment charges: In the determination of carrying values and impairment charges, Management looks at the higher of: recoverable amount; fair value less costs to sell in the case of assets; and significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that Management make a decision based on the best available information at each reporting period;
- Restoration, rehabilitation and environmental obligations: Management determined there were no material restoration, rehabilitation and environmental obligations, based on the facts and circumstances that existed in the current period that would trigger recognition of the provision in accordance with IAS 37, “Provisions, contingent liabilities and contingent assets”;

Blue Thunder Mining Inc.

Notes to the Condensed Interim Consolidated Financial Statements for the three and six months ended
June 30, 2021 and 2020
(Expressed in Canadian Dollars)

- Management determines the fair value of warrants and stock options using the Black-Scholes option pricing model; and
- Income taxes and recovery of deferred tax assets: The measurement of income taxes payable and deferred income tax assets and liabilities requires Management to make judgments in the interpretations and application of the relevant tax laws. The actual amount of income taxes only becomes final upon filing and acceptance of the tax return by the relevant authorities, which occurs subsequent to the issuance of the financial statements.

New Accounting Standards Not Yet Effective

IAS 1 – Presentation of Financial Statements (“IAS 1”) was amended in January 2020 to provide a more general approach to the classification of liabilities under IAS 1 based on the contractual arrangements in place at the reporting date. The amendments clarify that the classification of liabilities as current or noncurrent is based solely on a company’s right to defer settlement at the reporting date. The right needs to be unconditional and must have substance. The amendments also clarify that the transfer of a company’s own equity instruments is regarded as settlement of a liability, unless it results from the exercise of a conversion option meeting the definition of an equity instrument. The amendments are effective for annual periods beginning on January 1, 2023.

IAS 37 – Provisions, Contingent Liabilities, and Contingent Assets (“IAS 37”) was amended. The amendments clarify that when assessing if a contract is onerous, the cost of fulfilling the contract includes all costs that relate directly to the contract – i.e. a full-cost approach. Such costs include both the incremental costs of the contract (i.e. costs a company would avoid if it did not have the contract) and an allocation of other direct costs incurred on activities required to fulfill the contract – e.g. contract management and supervision, or depreciation of equipment used in fulfilling the contract. The amendments are effective for annual periods beginning on January 1, 2022.

4. Financial Risk Management

Financial risk

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (including interest rate, foreign currency risk and price risk).

Risk management is carried out by the Company's Management with oversight of these risks by the Company's Board of Directors.

(i) Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and other receivables, which consist mainly of taxes recoverable. The Company has no significant concentration of credit risk arising from operations.

(ii) Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. At June 30, 2021, the Company had cash of \$1,255,562 (December 31, 2020 - \$3,088,695) to settle current liabilities of \$637,215 (December 31, 2020 - \$1,012,804). Current liabilities include a flow-through share liability of \$291,361 (December 31, 2020 - \$652,677) which does not get settled by cash. Instead, this balance is amortized (decreased) against qualifying flow-through expenditures which are required to be incurred before December 31, 2022. See note 19 – *Commitments and Contingencies*. All of the Company's financial liabilities have contractual maturities of less than 30 days.

Blue Thunder Mining Inc.

Notes to the Condensed Interim Consolidated Financial Statements for the three and six months ended
June 30, 2021 and 2020
(Expressed in Canadian Dollars)

(iii) Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates and quoted prices.

(a) Interest rate risk

At June 30, 2021, the Company had \$1,255,562 (December 31, 2020 - \$3,088,695) in cash balances and interest-bearing investments. The Company's current policy is to invest excess cash in high yield savings accounts and guaranteed investment certificates issued by a recognized Canadian chartered bank. The Company periodically monitors the investments it makes and the creditworthiness of the bank where the investments are held. As a result, Management believes the Company's exposure to interest rate risk is minimal.

(b) Foreign currency risk

The Company does not have any significant assets in any currency other than its functional currency, nor does it have significant foreign currency denominated liabilities, therefore any changes in foreign exchange rates should not give rise to any significant change to the ongoing results of operations.

(c) Price risk

The Company is exposed to price risk with respect to equity prices and commodity prices. Equity price risk is defined as the potential adverse impact on the Company's loss due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact and economic value due to commodity price movements and volatilities. As the Company is not a commodity producer, Management believes the Company's exposure to price risk is minimal.

7. Capital Risk Management

The Company manages its capital with the following objectives:

- to ensure sufficient financial flexibility to achieve the ongoing business objectives including funding of future growth opportunities, and pursuit of accretive acquisitions; and
- to maximize shareholder return.

The Company monitors its capital structure and makes adjustments to it according to market conditions in an effort to meet its objectives given the current outlook of the business and industry in general. The Company may manage its capital structure by issuing new shares, adjusting capital spending, or disposing of assets. The capital structure is reviewed by Management and the Board of Directors on an ongoing basis. The Company's ability to continue to carry out its planned exploration activities is uncertain and dependent upon securing additional financing.

The Company considers its capital to be comprised of share capital, warrants reserve, contributed surplus and accumulated deficit, which at June 30, 2021 totaled \$1,999,985 (December 31, 2020 - \$3,277,685).

The Company manages capital through its financial and operational forecasting processes. The Company reviews its working capital and forecasts its future cash flows based on operating expenditures, and other investing and financing activities. The forecast is updated based on activities related to its mineral properties. The Company's capital management objectives, policies and processes have remained significantly unchanged during the three and six months ended June 30, 2021 and 2020.

The Company is not subject to any capital requirements imposed by a lending institution or regulatory body, other than of the TSXV which requires adequate working capital or financial resources of the greater of (i) \$50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of 6 months. As of June 30, 2021, the Company believes it is compliant with the policies of the TSXV.

8. Flow-Through Share Premium Liability

The following is a continuity schedule of the liability of the flow-through share issuances:

Balance, December 31, 2019	\$38,395
Liability incurred on flow-through shares issued	1,075,070
Flow-through share premium recognized	(460,788)
Balance, December 31, 2020	\$652,677
Flow-through share premium recognized	(361,316)
Balance, June 30, 2021	\$291,361

The flow-through common shares (defined below) issued in the private placements completed during the year ended December 31, 2020 were issued at a premium to the estimated price of a regular common share, in recognition of the tax benefits accruing to subscribers. The flow-through share premium for these private placements was estimated to be \$1,075,070. The flow-through share premium is derecognized through income as the eligible expenditures are incurred.

9. Share Capital

a) Authorized share capital

The authorized share capital consists of an unlimited number of common shares. The common shares do not have a par value and all issued shares are fully paid. See note 1 for exchange ratio in connection with the BTM Transaction, which has been reflected in these Interim Financial Statements.

b) Common shares issued

The following table represents the changes to share capital during the year ended December 31, 2020, and the period ended June 30, 2021:

Under the acquisition accounting rules, BTMC was determined to be the accounting acquiror of Platform Eight. The transaction is assumed to constitute an asset acquisition as Platform Eight did not meet the definition of a business.

18. Segmented Information

The Company's only activity is mineral exploration and evaluation. All of the Company's field equipment and supplies, and exploration claims are physically located in the Province of Quebec.

19. Commitments and Contingencies

- i. Flow-through shares: pursuant to the terms of flow-through share agreements, the Company is in the process of complying with its flow-through contractual obligations to subscribers with respect to the Income Tax Act (Canada) requirements for flow-through shares. Under regular rules, all proceeds raised through the issuance of flow-through shares would have to be spent on Canadian Exploration Expenditures (as such term is defined in the Income Tax Act (Canada)) by December 31, 2021, arising from the flow-through share offerings completed during 2020. On July 24, 2020, the Government of Canada announced its proposal to assist flow-through share issuers due to the impacts of COVID-19, by extending the timelines for spending the capital raised through the issuance of flow-through securities by 12 months. On June 29, 2021, this legislation was signed into law. The Company now has until December 31, 2022 to comply with its spending commitments. The Company has indemnified the subscribers of the flow-through shares for taxable amounts that may become due if the Company does not complete its contractual obligations related to the flow-through shares.
- ii. COVID-19: see note 1 – *Going Concern*.
- iii. Property payments: see note 13 – *Exploration and Evaluation Assets*.
